

## American Psychiatric Association Practice Guideline for the Treatment of Patients with Panic Disorder (American Psychiatric Association Practice Guidelines)

This guideline summarizes data to inform psychiatrists of the care of patients with panic disorder. It begins at the point where the psychiatrist has diagnosed an adult patient as suffering from this disorder according to the criteria in DSM-IV and has evaluated the patient for the existence of coexisting mental disorders. It also assumes that the psychiatrist or other physician has evaluated the patient for general medical conditions or other factors that may be causing or exacerbating the panic or that may affect the treatment. The guideline also briefly addresses issues specific to the treatment of panic disorders in children and adolescents.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
