

# Evaluation of Heat and Carbon Monoxide Exposures to Border Protection Officers at Ports of Entry

The National Institute for Occupational Safety and Health (NIOSH) received a union request for a health hazard evaluation at the Customs and Border Protection (CBP) ports of entry in El Paso, Texas. The request concerned CBP officers work in hot environments and potential exposure to carbon monoxide from vehicle exhaust. This report contains NIOSH's findings and recommendations.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
