

Institutions, Contracts and Organizations: Perspectives from New Institutional Economics

This work presents contributions from leading economists, including Ronald Coase, Douglass North, Masahiko Aoki, Oliver E. Williamson, and Harold Demsetz, and demonstrates the extent of the New Institutional Economics research programme. It lays out the fundamental dimensions of the research programme, placing emphasis on the interaction between institutional factors, both formal and informal, and the performance of different arrangements that organize transactions. It presents conflicting and perhaps controversial views on the sources of growth, placing special emphasis on organizations and transactions, focusing on issues of trust, corruption, enforcements of contract and modes of organizations.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
