

Autism and the Seeds of Change: Achieving Full Participation in Life through the Davis Autism Approach

An in-depth look at a revolutionary approach to empower individuals with autism, and provide the understanding and tools needed to achieve their full potential. The Davis Autism Approach is uniquely geared to the autistic perspective, and enables each person to make sense of their world and the motivations and behaviors of others around them. This book explores the history of development of the Davis method, explores its connections to emerging scientific research, and takes the reader on a guided journey through the three phases of the program: Individuation, Identity Development, and Social Integration.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
