

The Elephant in the Room: Data What you need to know to best Govern and Manage your enterprise data.

Most people understand the phrase: there is an elephant in the room. Its that big thing that nobody really wants to talk about. People ignore. They turn their heads. Close their eyes. Cover their ears. For many businesses, one important conversation that people are ignoring involves data. For many businesses, their data is defective. Their data has errors. And not just a little bit of error many years and years worth. Compounding every day. They are knowingly running their business on unreliable data. And that unreliable data is buried into every business process and every system implemented and therefore are part of everyones costs. And of everyones decisions. Which compound even more. Buried and often out of sight until something really big goes wrong. And at some point, something always goes wrong.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
