

# Speaking Our Minds: Personal Reflections from Individuals with Alzheimers

Four million people have been diagnosed with Alzheimers disease in this country, yet most live in silent shadows, their stories untold. In *Speaking Our Minds*, seven diagnosed individuals of various ages and backgrounds express their thoughts and feelings about what it is like to have Alzheimers disease, to live with it day to day, and to cope with its impact on their lives. Although afflicted with the same disease, each persons experience is unique. Told with honesty and insight, their stories cover personal history, diagnosis, family and social interactions, philosophical and religious perspectives, and the many neurological and psychological dimensions of the disease that permeate their lives. Transcribed from taped, in-home interviews, the seven narratives are interspersed with the authors own thoughts and observations about the different lives unfolding before her and of the disease whose common themes bind them all together. What emerges is a powerful and compassionate portrait of people forced to define themselves in new ways, not just by what has been lost, but also by what endures. A unique and illuminating exploration of the subjective experience of Alzheimers disease, *Speaking Our Minds* offers hope and understanding to anyone whose life has been irrevocably touched by it.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan

(Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
