

# The Debt Delusion: Evolution and Management of Financial Risk

In the twenty-first century, corporations delude themselves that their operations are capitalist. In fact the high levels of debt, based on dubious assets reflect debtism not capitalism. Over the ages, debt has crippled countries and economies, companies, large and small, because of biased optimism by lenders and borrowers. Debt is the most common global financial risk and needs to be controlled at Board level, even before trained executives endeavour risk management. The Debt Delusion provides a history of money and debt that should lead all Directors and executives to study recommended ways to manage debt. Management of debt will be extremely important in 2008.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
