

Pathological Anxiety: Emotional Processing in Etiology and Treatment

Bringing together prominent researchers and practitioners, this authoritative volume describes significant recent advances in understanding and treating anxiety that are grounded in emotional processing theory and the seminal work of Edna Foa. Current etiological perspectives are explained; effective assessment approaches discussed; and important findings presented on the benefits of cognitive-behavioral therapies, pharmacotherapy, and combined treatments. Coverage encompasses the full range of frequently encountered disorders: posttraumatic stress disorder, obsessive-compulsive disorder in children and adults, panic, generalized anxiety, social phobia, and complicated grief. Special topics include the introduction of a new treatment, virtual reality exposure therapy.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
