

Understanding Alzheimers Disease and Other Dementias

In this comprehensive yet accessible guide, Brian Draper, a leading expert on Alzheimers disease and other dementias, describes the symptoms, treatment and management of dementia. Covering everything from assessment and diagnosis to drug and psychosocial treatments, community and residential care options, assistive technology, support for families and other caregivers, ethical and legal considerations, end of life decisions and the latest research and treatment developments, the book provides a complete road map for those supporting someone with dementia, in either a personal or professional capacity. The book will demystify dementia and increase understanding about why it occurs, current treatments and therapies and how it may be managed. Filled with useful information and advice, it will be an invaluable resource for relatives and carers, and a useful reference on the desk of any professional working with individuals with dementia.

Abravanel's World of Torah, upon completion, will comprise a multi-volume set of Don Yitzchak Abravanel's commentary to the Five Books of Moses. This series is not a linear translation but rather a methodical, structured interpretation of Abravanel's commentary. It is designed to be read and studied independently or can be used as an excellent guide and helpful companion to the Hebrew original.

Abravanel's World of Torah: Bereshit was originally published by Torah Renaissance Press in 2012. This was followed by a Second Printing (2nd Ed.) in 2013 and a Third Printing in 2014.

Abravanel's World of Torah: Shemot Volume I covers the first six parshiyot in Sefer Shemot. This volume features a systematic translation of Abravanel's classic commentary beginning with Parashat Shemot until the end of Parashat Mishpatim, plus much more.

Abravanel's World of Torah: Shemot Volume II concludes Sefer Shemot. It features an in depth analysis of the Mishkan (Tabernacle), the Thirteen Attributes, and much more.

Vayikra is due out in the Spring of 2017.
